Web Site for Learn Photoshop Easily

KEG/IT/2022/F/0022

Department of Information Technology

Advanced Technological Institute

Kegalle

2022

Introduction

There are very few opportunities to learn something like this for children with disabilities who are slow to adapt to new technology. Therefore, this web page is intended to help them and all those who are interested in this field. Here you have the opportunity to learn Photoshop easily with video examples. Done. Let's learn.

Details Description of Features

- You can get a rough idea about this website from the home page
- This is designed for those who want to learn Photoshop so that they can study clearly.
- You can select the sections you want from the buttons on the top bar.
- You can browse the sections available to study using the category button. Click to learn button next to the required section will take you to that learning portal.
- There, you are provided with facilities to learn in written form as well as through videos.

I respectfully say to use it in a good way to gain knowledge and guide others
