**Web Site for Learn Photoshop Easily**

KEG/IT/2022/F/0022

Department of Information Technology

Advanced Technological Institute

Kegalle

2022

## **Introduction**

Photoshop is a software of Adobe Company. It can be used for image creation, graphic creation and photo editing. It was only released in 1988. It was created by Thomas and John.

There are very few opportunities to learn something like this for children with disabilities who are slow to adapt to new technology. Therefore, this web page is intended to help them and all those who are interested in this field. Here you have the opportunity to learn Photoshop easily with video examples. Done. Let's learn.

## **Background and Motivation**

The background for the creation of this website was the lack of video tutorials, etc., required to obtain the necessary knowledge along with the increase in the number of people seeking knowledge.

They were there, but only to a certain extent. So I am creating this website to support

## **Goal, Objectives and Scope of the project**

- The aim of the grant is to provide a thorough knowledge of Photoshop
- Another objective is to create new employment opportunities
- With video lessons that give detailed knowledge about Photoshop

## **Proposed Solution**

Photoshop has become an indispensable weapon these days. It is sad that only a handful of us who are slowly entering the digital world have knowledge about this. My effort is to provide an opportunity for everyone to learn this easily.

## Project Plan

Time Management	Weeks								
	01	02	03	04	05	06	07	08	09
Collecting Information about the Photoshop									
Preparation of a transcript containing the collected information									
Setting the web page layout according to the script									
Making videos using screen recording according to the script									
Making the necessary edits using software and creating the web page									
Prepare presentation									

## Resource Requirements

### ➤ Software Requirements :-

- adobe Photoshop 2023
- adobe premiere pro
- html
- CSS

### ➤ Hardware Requirements :-

- Camera
- laptop
