Declaration

I chose to create an easy website to learn Photoshop. The website was developed by M.A.I.Kumara (KEG/IT/2022/F/0022) me. I was able to complete the project as planned without any issues. Madam Tilini Bakmaideniya and Madam Dilhani Vepathana guided me for this. I have mentioned all the sources I used for this at the end to save the authorship.

Abstract

Photoshop is a software of Adobe Company. It can be used for image creation, graphic design and photo editing.

Children who are slow to adapt to new technology have very few opportunities to learn something like this. So this web page is intended to help them and all those who are interested in this field. Here you have the opportunity to learn Photoshop easily with video examples. Let's learn.

Acknowledgment

I welcome all those who want to develop their skills. It is important that you guide others and

I welcome Mrs. Thilini Bakmeedeniya and Madam Dilhani Wepathana who have been of great help in this.

And I would like to thank all my friends and lecturers who helped me for this.

Chapter Summaries

CHAPTER 1

Introduction

Photoshop is a software of Adobe Company. It can be used for image creation, graphic creation and photo editing. It was only released in 1988. It was created by Thomas and John.

There are very few opportunities to learn something like this for children with disabilities who are slow to adapt to new technology. Therefore, this web page is intended to help them and all those who are interested in this field. Here you have the opportunity to learn Photoshop easily with video examples. Let's learn.

Project background

The background for the creation of this website was the lack of video tutorials, etc., required to obtain the necessary knowledge along with the increase in the number of people seeking knowledge.

They were there, but only to a certain extent. So I am creating this website to support

Aims and objectives

- The objective of the grant is to provide thorough knowledge of Photoshop
- Another objective is to create new job opportunities (like fivver, photography).
- Complete learning with video tutorials that provide detailed knowledge of Photoshop
- Empowering children with disabilities by providing free services.

CHAPTER 2

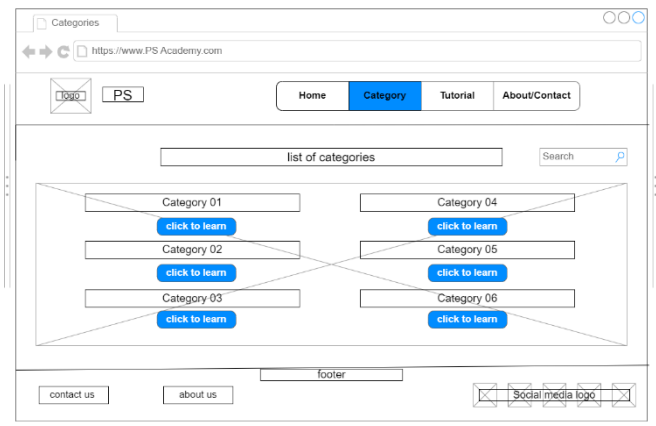

Design and Implementation

Design details/templates

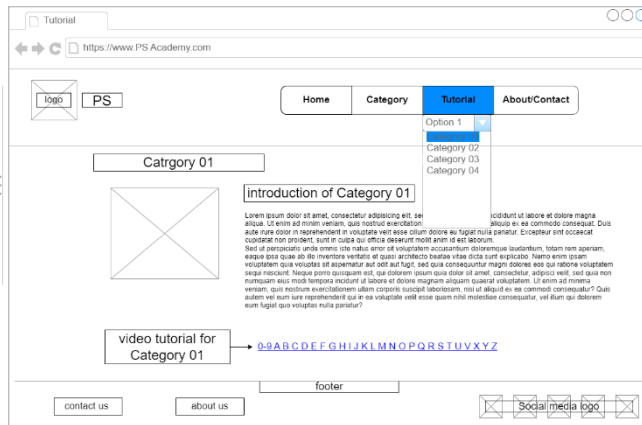

Home Page

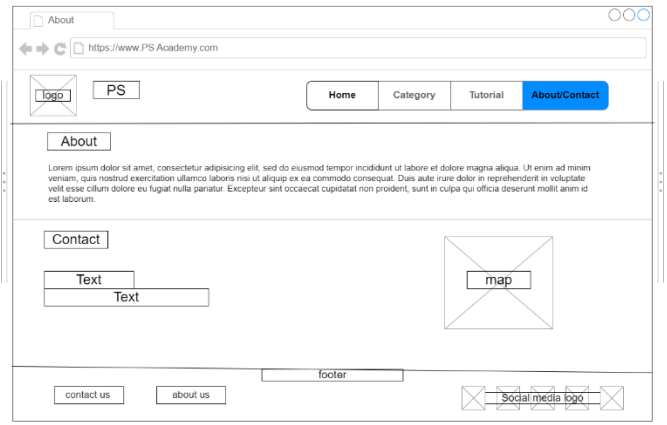

Category Page

Tutorial Page

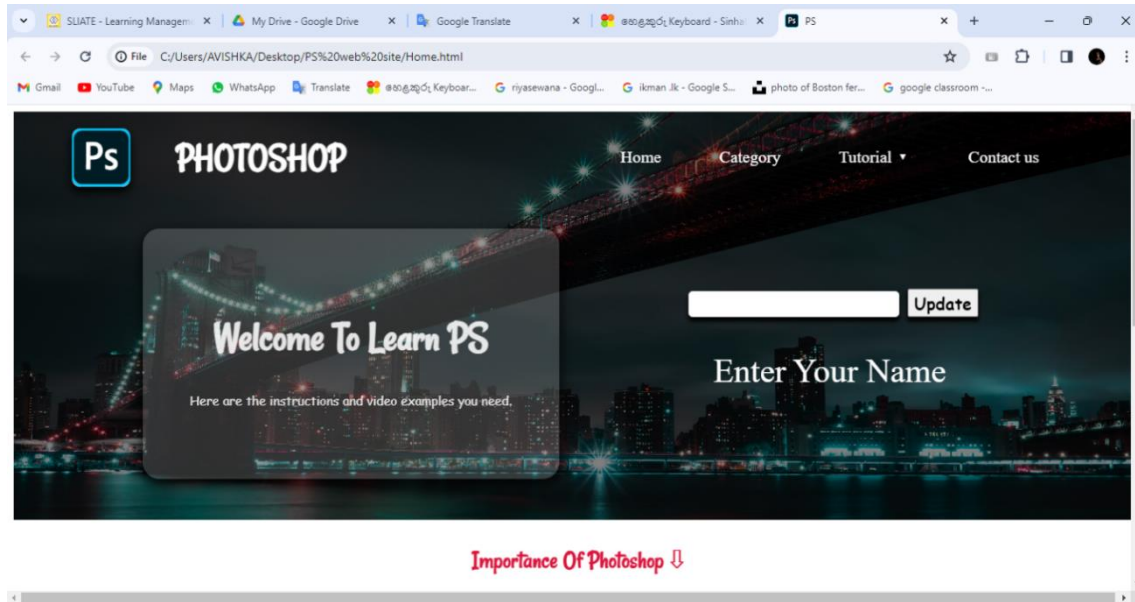

Contact Page

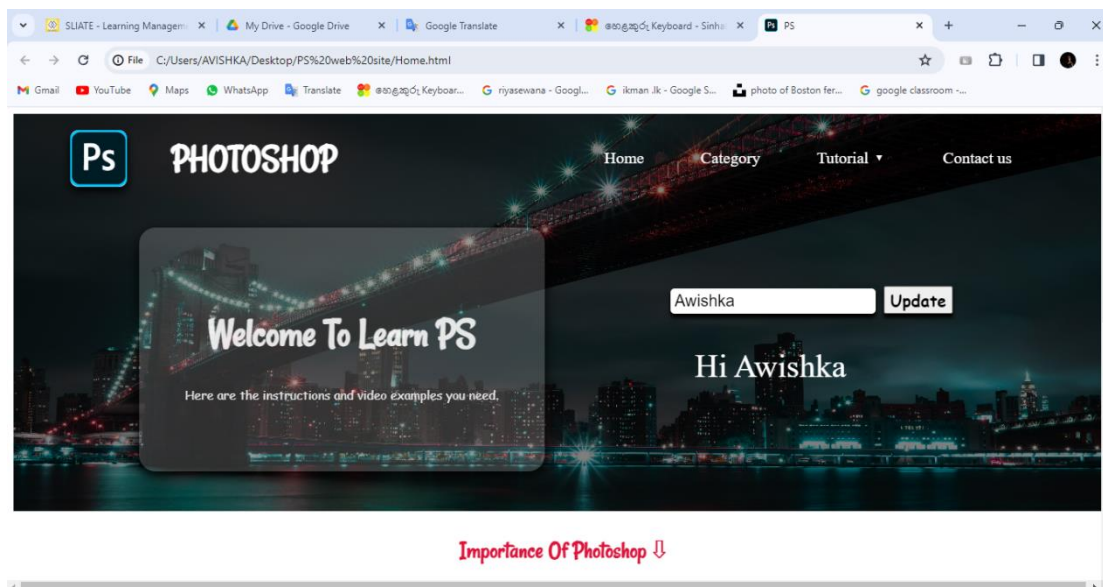

Test Results / Problems

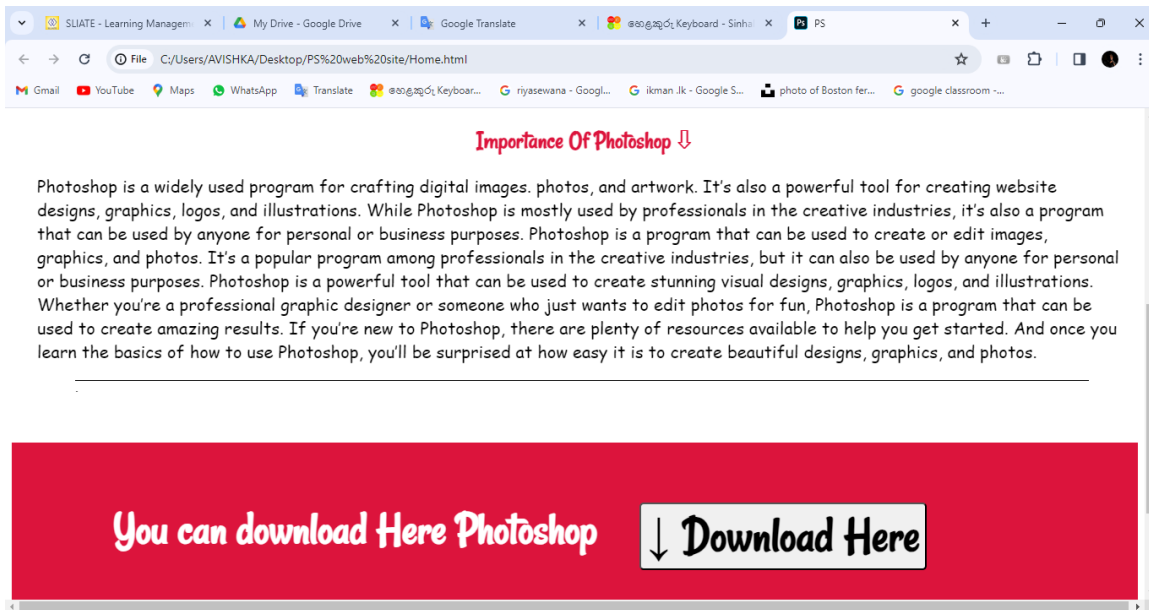

- This is the Home page of the Web Site

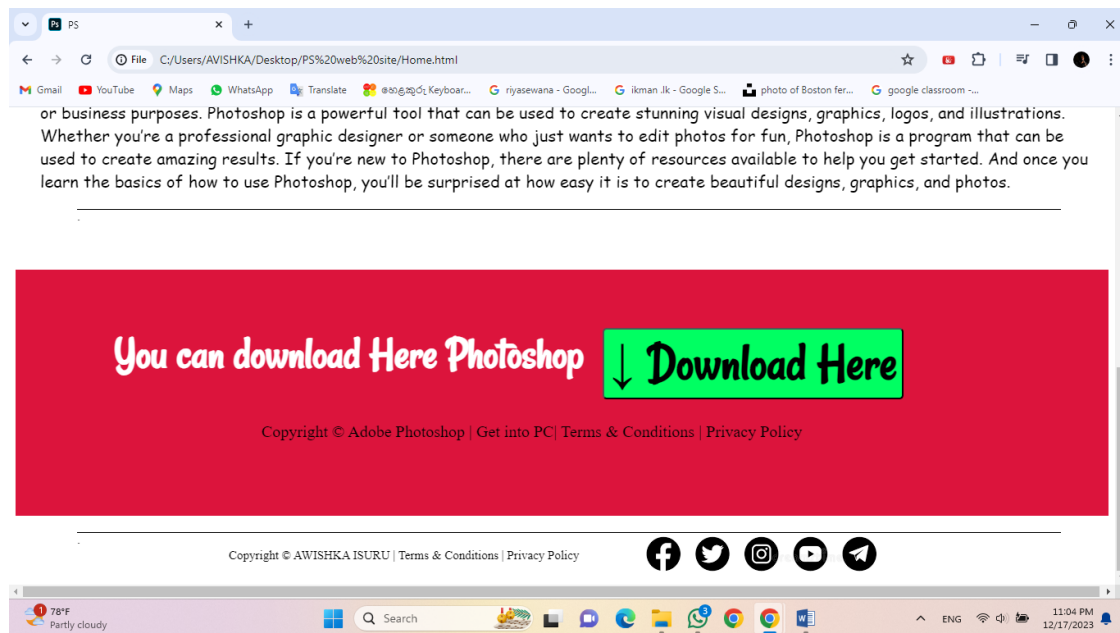

- This is the home page. I have added a small welcome for those new to this site. You can try it, enter your name and click update button.

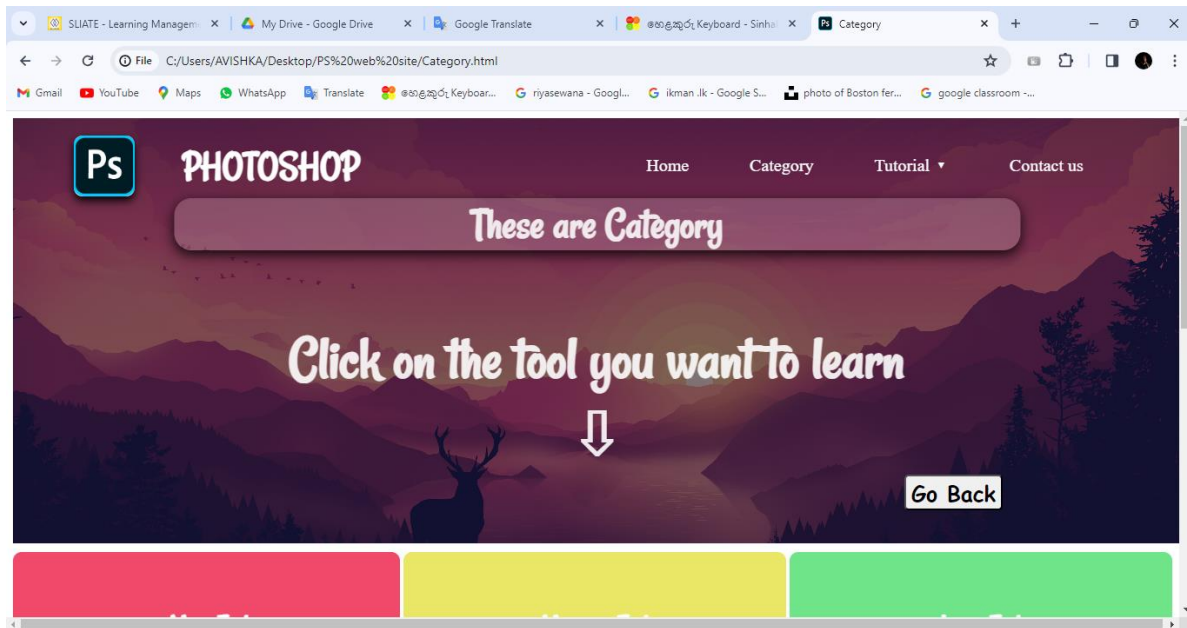

- I have added a small description about the importance of Photoshop in the middle of the home page.

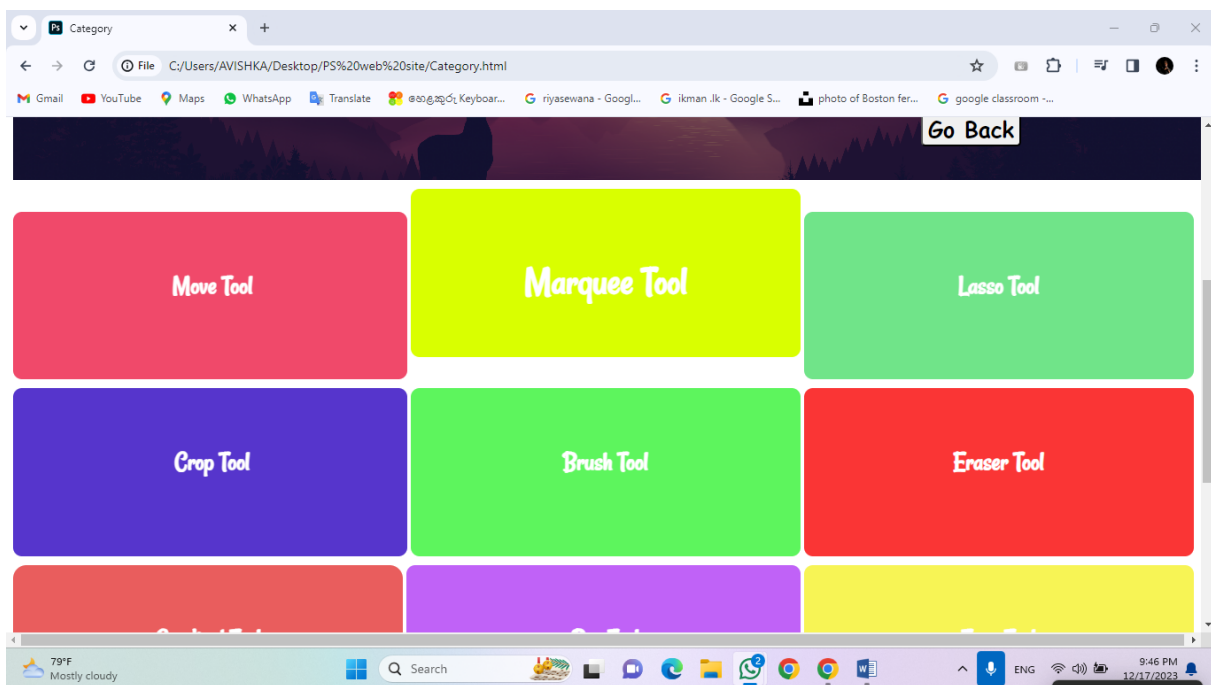

- Next I've added the button to download Photoshop and footer at the bottom of the page.

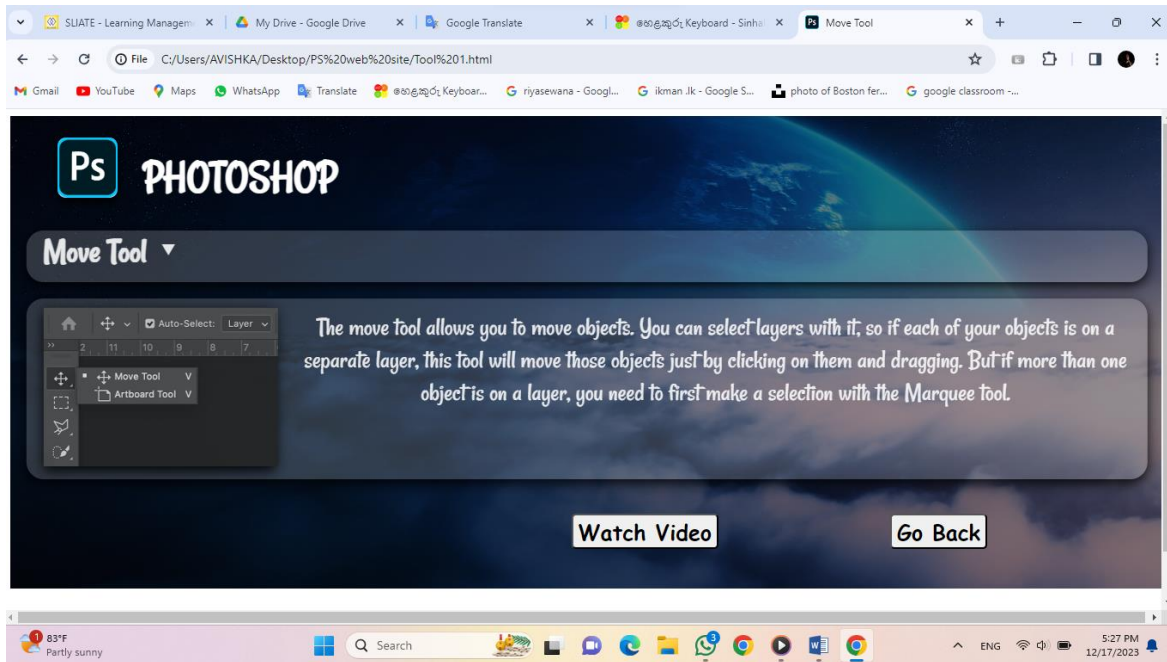

- Category page on the next page of this site.

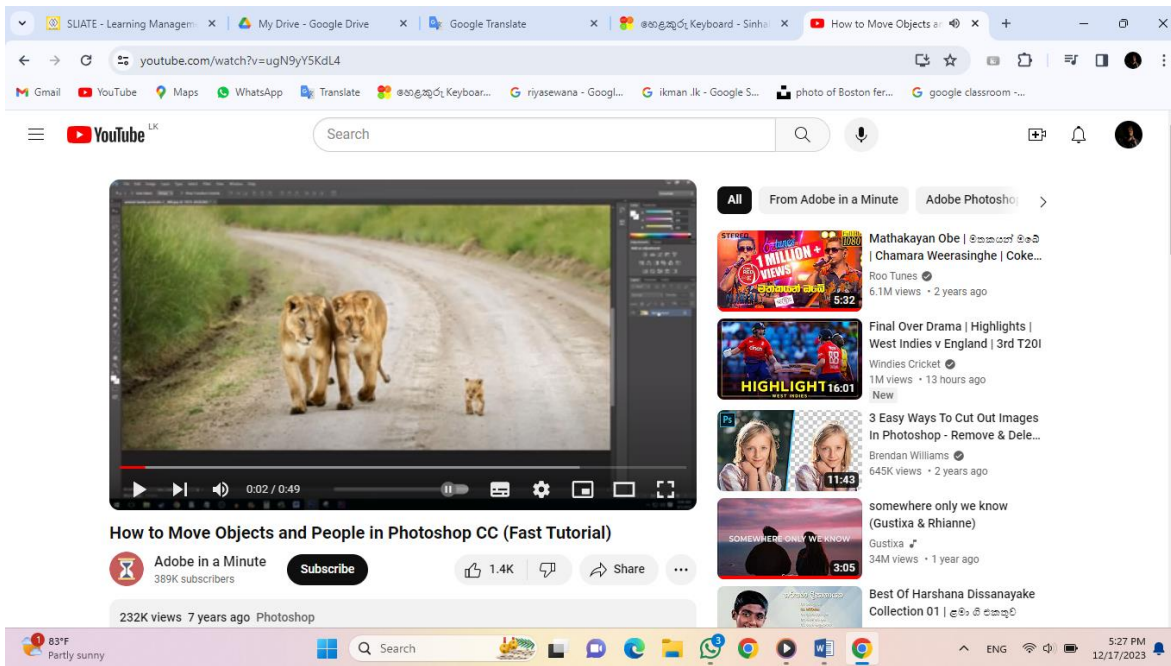

- Here are all categories of Photoshop. If you want to learn about any tool, you can click the box and go to the tutorial about the selected tool.
- Once you find the tool you want, the box will pop up and change color. It is easy to understand

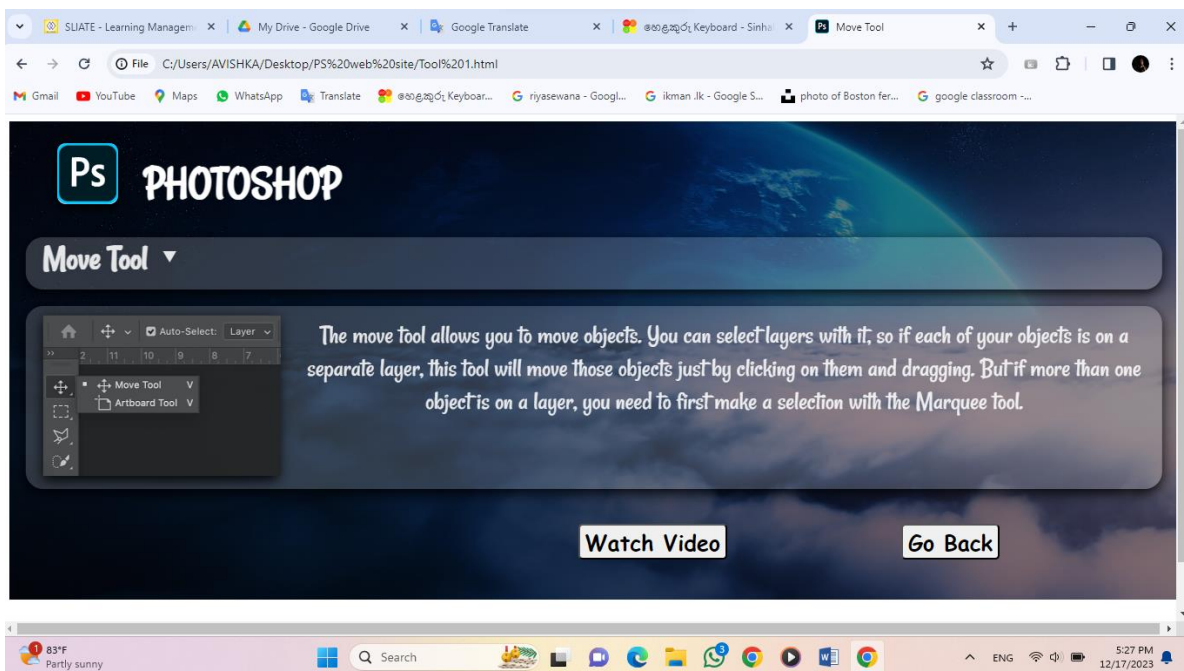

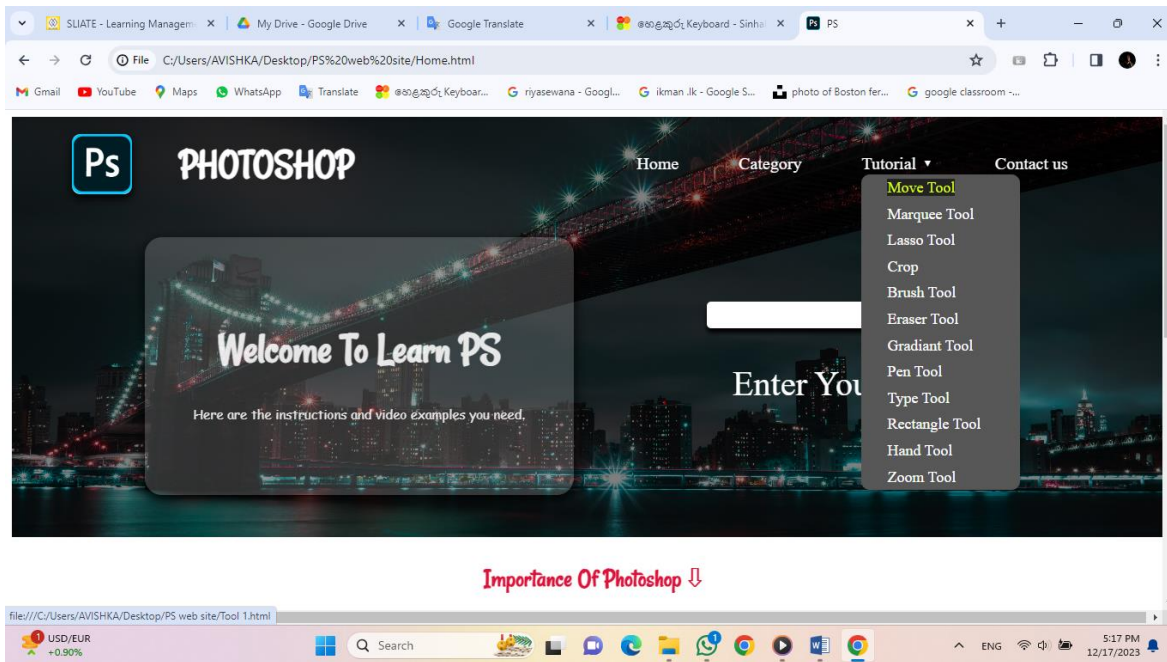

- As mentioned above, when you click on the tool you want, you will be transferred to the tutorial page related to the tool shown below.

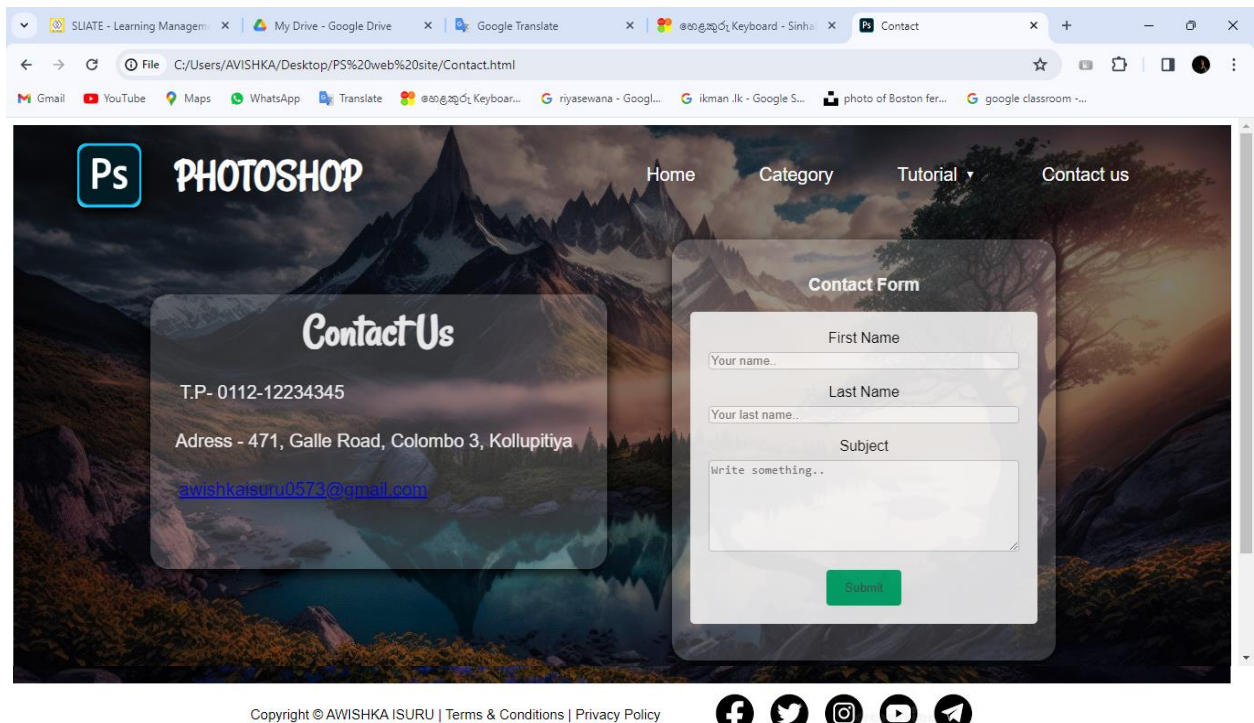

- Clicking the Watch Video button on the page above will take you to YouTube to show a video example of the tool.

- As an easy way to go to the category, a button named Tutorial has been included in the navigation bar on the home page. It is set as a drop down. Selecting the tool you need from there will take you directly to the tutorial for that selected tool.

- Finally a contact us page has been created for you to contact us. A form has been provided so that we can comment your opinion about the website.

CHAPTER 3

Conclusion

It is very easy for us to remember the work we started without basic knowledge when we search for information ourselves. I think this web site will never be forgotten.

Future proposals

I intend to improve this further in the future.

To start working on this web page, log in with a unique account, provide search facility, also plan to share background images, offer question and answer service and offer online training sessions.

Hope to work on it soon

Problems

I had to face the problems that came up while coding because it is not made differently from other Photoshop related websites.

When Photoshop software is included in this website, it is subject to the rules related to that software.

Sometimes copyright issues.

Photoshop is something different and new to many people, So we need to be very careful about the changes we make on the website user friendly.
